Arm	Disease named	Retrieved text	Role
A1	none	none	fair baseline, same answer style
A2	none	from the question alone	oracle subset: why the disease matters
A3	true disease (oracle)	none	upper bound: value of knowing the disease
A4	true disease (oracle)	yes	upper bound: value of retrieval
A5	model's own guess	none	real: the guess alone
A6	model's own guess	yes	the system

oracle: uses SLAKE's own label, an upper bound, never the result

real: uses only what the model outputs
