Arm	Disease named	Retrieved text	Role
● **A1**	none	none	fair baseline, same answer style
● **A2**	none	from the question alone	oracle subset: why the disease matters
● **A3**	true disease (oracle)	none	upper bound: value of knowing the disease
● **A4**	true disease (oracle)	yes	upper bound: value of retrieval
● **A5**	model's own guess	none	real: the guess alone
● **A6**	model's own guess	yes	the system

● oracle: uses SLAKE's own label, an upper bound, never the result

● real: uses only what the model outputs
